

**MONTCALM**  
WINE IMPORTERS, LTD

## **MONVIN BIANCO FRIZZANTE 20 LITER POLY KEG**

Bianco Frizzante is the result of a careful vinification of white grapes varieties (predominantly Glera).

Once the base wine is obtained following the “on white” winemaking process rules, the following step is the sparkling process. A short period of laying on yeast will follow. The sparkling wine will then be kegged.

Straw yellow in color, it has a slightly aromatic, fruity bouquet enhanced by a light, pleasant sparkle.

Contains Sulfites

Alcohol by Vol:	11%
Total acidity %:	5.40
% sugar content:	1.40
SO <sup>2</sup> mg/l:	100
Pressure atm.:	2.50
Content:	20 Liter
Pallet Configuration:	42 PolyKegs per 100 x 120 pallet (14 kegs on 3 layers)

Disposable Kegs.

No returns / No deposit required.

20-lt Kegs hold the equivalent to 26 bottles or 135 5oz glasses

100% Recyclable

Lightweight

Fitting works with stainless steel Sankey type S 304 coupler.

PolyKeg

### **ABOUT THE WINERY**

MonVin is the indisputed leader in the production of quality wine on tap. A huge experience in the wine on tap world, allow MonVin to constantly improve the quality of products and to select from a wide range of wines.

MonVin has implemented a severe traceability project that allows to retrace all the productive phases of our wine: from your glass right back to the vinification process. The technical staff, composed by seven enologists, constantly follows every production and KEG filling process. During the last 10 years MonVin has invested 10 million Euro in technological innovations, the company speaks highly of their patented products in the enological sector.

The Keg is the best device to conserve wine, because it doesn't come in touch with light and, most importantly, with air: it's like drinking from a freshly uncorked bottle, every time.
